

Company Presentation

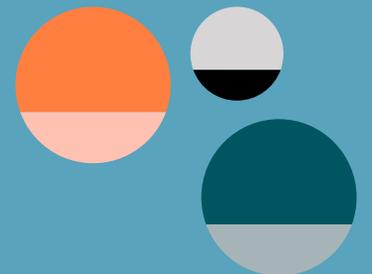

With 3 decades of National and SME experience.

We get to know your brand and create professional designs.

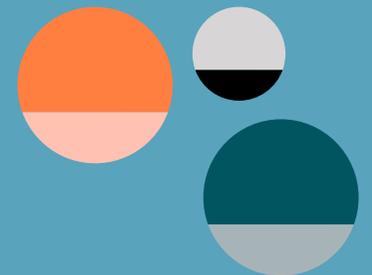

We offer the complete package from brand, website, digital, print material, exhibitions, advertising to emailer creative solutions.

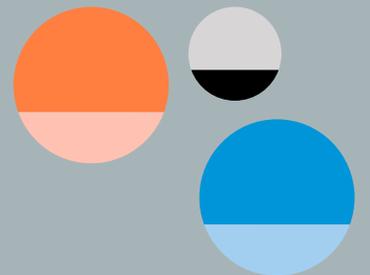

We've worked with clients from; ADAS, ABM, Advance Housing, Blackwell's, British Motor Heritage, Bruce Hardwood Floors, Croft Associates, Earthwatch, Ernst & Young, Guideposts Trust, Heinemann, Kyocera, Love Pork, Lynx Group, Meat Matters, Nielsen, NSF Agriculture, NFU, Office World, London/Oxford Airport, Oxfordshire County Council, OUP, Peter Jones, Scholastics, to WODC.

Examples of our work.

About the ratings

The Clearwater™ Rating assessment program provides an independent and unbiased evaluation of a vessel's environmental performance.

Clearwater™ takes a different and more representative view of environmental performance to other rating schemes, focusing on how well the boat is designed to prevent pollutants from entering the air and water in which it operates, and not just on the manufacture of the vessel or its recyclability.

CLEARWATER NEWS

ISSUE 1 JANUARY 2019

A new benchmark for cleaner seas

Welcome to Clearwater Rating, the first fully independent and objective global standard to benchmark the lifetime environmental impact of boats and superyachts.

Clearwater Rating was launched in September 2018, after several years of discussion, study of relevant regulations, presentations and consideration of the factors that influence a boat's impact on sea or river, air, the surrounding community and resources. Our Rating Calculator clearly indicates how even small changes across a boat's construction, equipment and operation can make major differences to the environment across decades of service.

It is backed by a not-for-profit organisation dedicated to seeing the widest possible use of Clearwater Rating - please visit us at Boat Düsseldorf Hall 11 / H75 to learn more.

First Clearwater Rating awarded

Vita Yachts' Vita IX, was honoured as the very first recipient of our Clearwater environmental rating for boats and superyachts at the Monaco Yacht Show in September last year.

Vita Power was established in 2017 to bring the latest in automotive technology and engineering to the marine world. Its team brings a wealth of experience from related fields including electric boats, the super yacht sector and F1.

The Vita IX is a full-production electric boat inspired by classic boat building traditions. At 30ft long, it is powered by a ground-breaking propulsion system, incorporating proprietary throttle and touchscreen technology. The boat was designed in the UK and will be built at Vita's new hub on Lake Maggiore, Italy.

As a full electric boat with no onboard discharge and several other environmentally sound features, the Vita IX has been awarded our Gold standard Clearwater Rating.

Speaking after the presentation, Steven Wilkinson, Founder and Chairman of Vita Yachts said: "We are delighted to be associated with the Clearwater programme. The deteriorating health of the marine environment is becoming increasingly apparent with every passing year and unless our industry takes urgent action to tackle the problems that it has perpetuated, the consequences will be incalculable. Unfortunately, the lack of a universally recognised ratings system has historically made it difficult to encourage and promote environmentally responsible innovation in boat design, so we hope to see Clearwater Rating established as the industry standard as quickly as possible."

Please visit us at Boat Düsseldorf Hall 11 / H75

Latest calculator released

The Clearwater Rating Calculator version 6 is now released, having received several improvements to its content over the past few weeks. A reminder that you can download the Calculator, free of charge from: <http://clearwater-rating.org/the-clearwater-rating-system/>. We will continue to incrementally improve the Calculator's capabilities and its useful algorithms to related material. We appreciate input from industry professionals to help us maintain the relevance of this tool as environmental standards change and new opportunities for minimising impact evolve.

We're now in conversation with several parties about taking a wide selection of boats and superyachts through the Rating and it would be great to have contact from you regarding any opportunities you see for becoming an early adopter of the scheme.

Please email us on enquiries@clearwater-rating.org or call +44 1491 822918.

CLEARWATER

CLEARWATER-RATING.ORG

Assessment criteria

As the rating focuses on a vessels' outputs and emissions, it is not possible for a vessel powered primarily by fossil fuels to achieve a 3* rating. The scheme is designed to recognise those boat builders & owners who have put measures in place to minimise the impact of their boat on the waters and environments in which they sail.

The new Clearwater™ approach allows our customers to show an advanced commitment to corporate social responsibility and sustainability that goes beyond the requirement of legislation, setting benchmarks to raise the environmental standards of operations. The rating is non-compulsory, setting apart those vessels with a certified Clearwater Rating as an example of industry best practice.
